## PROOF OF FORMULA 3.381.3

$$\int_a^\infty x^{\nu-1}e^{-\mu x}\,dx=\mu^{-\nu}\Gamma(\nu,a\mu)$$

The  $incomplete\ gamma$  function is defined in 8.350.2 as

$$\Gamma(\alpha, x) = \int_{T}^{\infty} t^{\alpha - 1} e^{-t} dt.$$

The change of variables  $t = \mu x$  gives

$$\int_{a}^{\infty} x^{\nu-1} e^{-\mu x} dx = \mu^{-\nu} \int_{a\mu}^{\infty} t^{\nu-1} e^{-t} dt.$$

The second integral is given by the incomplete gamma function.
