## PROOF OF FORMULA 3.351.6

$$
\int_{-\infty}^{u} \frac{e^{x}}{x} d x=\operatorname{li}(u)=\operatorname{Ei}(u)
$$

This is the definition of $\operatorname{Ei}(u)$. The relation to

$$
\operatorname{li}(a)=\int_{0}^{a} \frac{d t}{\ln t}
$$

comes from the change of variables $\ln t=x$.
